

AEGIS Travel Secure

Protecting your personal and corporate information whilst on the move.

AEGIS is a unique travel system designed specifically for executive users, made exclusively in the UK by a veteran owned company, in order to provide complete digital signature and selected physical protection whilst on the move, anywhere on the globe.

In today's digital age, where data breaches and cyber threats are increasingly common, the importance of protecting your personal and corporate information cannot be overstated. With our Travel SECURE pack, you no longer have to compromise your security for convenience. Our unique and carefully curated executive travel pack promises to be an indispensable companion, ensuring that your electronic devices and more importantly - your personal and corporate information - remain safe and secure, whilst you remain completely operational wherever you travel in the world, whatever the circumstances.

✓ Comprehensive Protection

The Travel SECURE kit equips you with essential tools to defend against various electronic device threats and ensure business continuity, wherever life takes you. Whether you're facing malware risks at public charging stations or other risks closer to home, our travel pack has you covered. When combined with the AEGIS Executive Model One travel bag, the system also extends to providing life saving physical protection as well.

✓ Digital Signature Awareness

Included in your purchase is our online Digital Signature Awareness course, delivered live at regular monthly sessions by experienced practitioners, which offers unique insights on enhancing your defences against potential threats, ensuring you stay one step ahead of cyber criminals.

✓ Bespoke Security Solutions

Understanding that each traveller's needs are unique, the Travel SECURE system is designed to cater to a wide range of electronic devices. Whether you're a business professional with sensitive corporate data or a casual traveller with precious memories stored on your devices, our product is tailored to meet your specific security requirements without compromising on quality.

✓ Portable Travel Security

Cast aside the dangers of public Wi-Fi and embrace secure, uninterrupted connectivity with our state-of-the-art ATOM secure Travel Router and AEGIS Agile SIM. In the current digital era, the safety of your online activities while travelling is indispensable. Whether situated in a bustling airport, a quaint café, or a sumptuous hotel, our tiny secure Travel Router emerges as the quintessential travel ally, guaranteeing a private, encrypted, and secure internet connection against cyber threats.

✓ User-Friendly Experience

Despite its robust security features, the Travel Defend Series is incredibly user-friendly with minimal training burden to ensure not only your digital footprint is secure, but that you can operate just as well as you would back in the office.
