

# CCA - OSINT

Embark on a journey into the fascinating realm of Open Source Intelligence (OSINT) with our bespoke course, meticulously designed for individuals eager to master the art of conducting comprehensive background checks, verifying facts, and adeptly targeting persons through the utilisation of publicly accessible information.

## Justification and Overview

This course stands as an indispensable resource for professionals aiming to amplify their investigative skills or for those harbouring a keen interest in the transformative power of data gathering, tailored to impart a profound understanding of the myriad OSINT methodologies and instruments.

Our curriculum is infused with practical, real-world scenarios that facilitate hands-on learning, enabling you to navigate the intricate web of information available online, evaluate the reliability of diverse sources, and assemble crucial intelligence to bolster decision-making endeavours. Beyond mere theoretical knowledge, this course offers the opportunity to delve into advanced techniques for data analysis and interpretation, ensuring you are well-equipped to unearth and piece together information from the digital ether.

As you progress, you will be introduced to the ethical considerations and legal standards that underpin responsible OSINT practices, ensuring your investigative pursuits are both ethical and compliant with relevant legislations. This comprehensive training will not only hone your ability to sift through vast quantities of data but also enhance your critical thinking and analytical prowess, setting you apart in the field of information verification and intelligence gathering.

Enrol in our course today to unlock the vast potential of OSINT, elevate your professional capabilities, and gain proficiency in leveraging the wealth of information that lies at your fingertips, all within a supportive, interactive, and ethically guided framework.

## COURSE AIMS

This course offers targeted OSINT training, combining theoretical knowledge with practical labs. This OSINT course teaches you the art of conducting background checks, verifying information, and targeting individuals. Enhance investigative skills with hands-on training, ethical guidance, and advanced analysis techniques.

## CONDITIONS OF ENTRY

Students are not required to have any specific experience before participating in this course. A strong technical aptitude and the completion of other courses CCA series are strongly recommended or equivalent training, will lay a robust groundwork for this course.

Discover the transformative power of OSINT and become a skilled practitioner in the art of information gathering and analysis, **ready to navigate the complexities of the digital age with confidence and expertise.**

# CCA - OSINT

## Indicative Course Content

### • OSINT Basics

- Introduction to Open Source Intelligence (OSINT)
- Ethical and Legal Frameworks in OSINT
- Search Techniques and Tools
- Conducting Effective Background Checks
- Verifying Information and Sources Online
- Data Analysis and Interpretation in OSINT
- Digital Footprint and Social Media Investigation
- Utilising Geospatial Intelligence

### Creating Secure environments

- Creating An OSINT Environment
- Remote Software as a Service
- Remote computing
- Digital Signatures
- Privacy, Anonymity, and Security Measures

### Conducting Operation Tasks

- Search Techniques and Evading Patterns of Life
- Expert Search Strategies Beyond Basic Google Keywords
- Analytical Breakdown of Website Structures
- Source Code Monitoring and Tracking
- Evaluating and Assessing Organizations
- Discovering and Leveraging Documents
