

Forensics

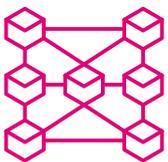

The only tool that's truly multi-chain.

There's no 'selecting a chain' or managing multiple tabs in TRM — and there never has been.

TRM was born in a multi-chain world and we engineered our data architecture to thrive in it. We provide a seamless, single graph solution to visualize transaction flows across any of the 30 blockchains and 70+ million digital assets we cover.

BENEFITS:

- ✓ We add new chains in weeks — not years.
- ✓ We cover all native assets on supported blockchains.

Why investigators choose TRM:

- We tell you where we got our information
- We surface network analytics for potential breakthrough clues
- TRM brings clarity to complex DeFi transactions
- TRM provides unmatched ERC-20 and NFT tracing capabilities
- TRM has automatic cross-chain tracing capabilities
- Demixing capabilities

Training and services to help you get more out of TRM Forensics

Count leading threat specialists as an extension of your team

TRM's threat intelligence unit frequently embarks on data sprints based on guidance from customers. Engage our team of specialist threat hunters covering dedicated areas such as terror financing, ransomware, CSAM, DPRK and darknet markets.

Tap our professional services team for added lift

Our team of experts leverage their experience leading major investigations at leading tech companies and government agencies, including the IRS-CI, FBI, Secret Service, Homeland Security Investigations, DOJ, and DEA to offer:

- Complex investigations support
- Funds tracing
- Threat intelligence briefing
- Dataset aggregation and analysis
- Manual demixing

Get access to robust self-serve training and instructor-led certifications

- TRM users get complimentary access to our extensive library of digital training courses, including product guides, practice investigations, glossaries and trend reports.
- Enrol in intensive certification programs taught by members of TRM's global investigations team.
