

MAGNET GRIFFEYE™

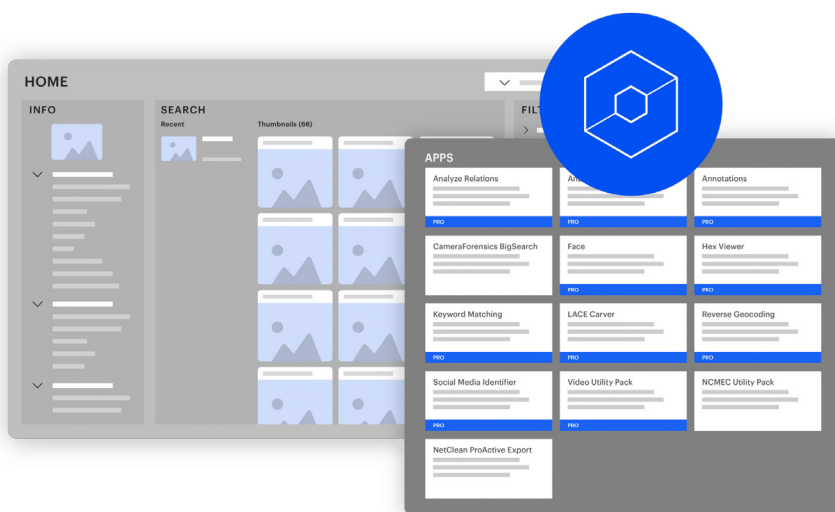

Transform Digital Media Overload into Investigative Insight

Swiftly process and analyze vast amounts of images and videos. Stay ahead in investigations with powerful analytics and collaborative capabilities, gaining a crucial edge in digital media analysis.

Elevate your digital media investigations with advanced image and video processing and analysis, collaborative case handling, and shared workload capabilities.

“I dealt with a giant cloud warrant return made up of backups upon backups. Thanks to Griffeye, we 'only' had to sift through 6,500 files instead of drowning in the total of 1.8 million files.”

DETECTIVE

KEY FEATURES OF GRIFFEYE

-  Automate, Detect, Prioritize
-  Advanced Media Analysis
-  Large-scale Collaboration
-  Open, Modular, Scalable

Automate, Detect, Prioritize

Magnet Griffeye handles the heavy data lifting, freeing investigators to focus on the human-centric tasks that demand their attention.

- Gain a clear indication of where to begin your investigation and identify the most relevant data for the case.
- Utilize AI technologies like Brain and Thorn.AI to automatically detect and classify various objects in large image sets, as well as identify and flag previously unseen images and videos depicting child sexual abuse.
- Save valuable time and energy through the pre-categorization of known data, stacking duplicates, and correlating metadata and visual attributes in your media files.

Advanced Media Analysis

Access a powerful set of analytical features, capabilities, and flexible workflows for a seamless and efficient experience.

- Quickly find and match all images and videos featuring different individuals, and search between the data to identify matching faces of suspects or victims.
- Rapidly and accurately review hours of video footage in a fraction of the time using advanced filtering capabilities such as motion, facial, and object-based searches.
- Enhance investigator well-being with multiple features designed to minimize exposure to harmful material.

Large-scale Collaboration

Magnet Griffeye incorporates cutting-edge technology designed to interconnect investigators and make information sharing a seamless process.

- Establish connections to multiple GID databases, including external sources such as NCMEC, to seamlessly collaborate with investigators on a national or international scale.
- Hashes and added intelligence are easily uploaded to any shared GID for direct accessibility by other investigators on both ongoing and previous cases.
- Effortlessly identify previously viewed media and reduce the number of case files that need to be reviewed.

Open, Modular, Scalable

Unlock the potential of an open and modular platform designed for flexibility. Customize Magnet Griffeye to fit your needs – effortlessly integrate external sources and tools, allowing you to add new functionality as your needs change.

- Explore a dynamic marketplace for apps and add-ons, including third-party options.
- Effortlessly customize and enhance functionality to always have the best tools for the job.
- New innovative tools are continuously added and updated.
