CLARITAS

MAGNET WITNESS™

Upgrade Your Video Forensics Solution

Magnet WITNESS is the evolution of Magnet DVR Examiner that now enables you to acquire, review, and analyze video evidence, all with one advanced product.

The Challenge

Video footage can be an essential source of evidence in criminal investigations.

This evidence includes an increasing amount of DVR surveillance video, body cams, and dash cams, but also video from doorbell cameras, home security solutions, or mobile phones. Recovering and analyzing evidence from these sources can present challenges without the right tools.

Over 80% of criminal cases are estimated to use video evidence.

Our Solution

Built with the foundation of DVR Examiner, Magnet WITNESS recovers more video evidence than ever, including video from over 50 native DVR file formats plus cloud sources like Ring or Arlo.

Review, analysis, and output are easier with new capabilities like synchronized matrix views and sub-clipping.

MAGNET WITNESS™

MAGNET FORENSICS®

WITNESS: The Evolution of DVR Examiner

- WITNESS is built with the foundation of DVR Examiner and expands on it with new and improved features to make tackling video investigations easier than ever.
- Connect directly to and recover evidence, including footage and metadata from DVRs that may be damaged, burnt, or broken.
- Bypass passwords and skip unfamiliar or complicated third-party menus or interfaces.
- Recover evidence that has been overwritten or intentionally deleted.

More Video

- Easily handle video for complex cases by bringing all your video into a single investigative tool, track subjects and victims from source to source, and get the whole picture.
- Direct download of highest quality video directly from cloud sources (e.g., Ring, Arlo) with a forensically sound repeatable process.
- Organize by location and device to efficiently handle complex cases spanning many sources and locations.

Advanced Features

- Easily follow subjects or victims from camera to camera with a synchronized Matrix Preview: review up to 4 video clips from multiple sources in a single synchronized interface.
- Easier review and collaboration with other stakeholders using Notes, Tags, and Bookmarks.
- Highlight video clips, segments, or specific frames with items of interest and add detailed notes and reporting.
- Sub-clipping to extract pertinent information from larger clips.

Powerful and Easy to Use

- The Case Wizard simplifies the process of creating complex cases with multiple sources.
- Navigate with ease since WITNESS uses a familiar interface and design to other Magnet Forensics tools like Magnet AXIOM and DVR Examiner.
- Intuitive workflows that are easily understood and adopted by technical and non-technical stakeholders.
- One interface: forget about having to navigate foreign and unfamiliar third-party menus for every video source.
